Test case name:	Verify that get plan button can be focused and clicked by keyboard
Test case ID:	PRICING_6
Testing type	Usability
Preconditions:	• User is not logged in • Pricing page is opened (https://nordvpn.com/pricing/)
Test steps:	• Repeat 2 times – for top “Choose a VPN price and plan that fits you” part and bottom “Compare plans” part: ○ Repeat 3 times – for buttons “Get Basic”, “Get Complete”, “Get Ultra”: 1. Click “Tab” keyboard button to focus “Get <...>” button 2. Click “Enter” keyboard button 3. Verify that Checkout page is opened (https://order.nordvpn.com/payment/) 4. Go back to previous page

Order of importance (1-6):

1. First is test case that covers up direct revenue path – user able to choose a plan and go to checkout, prices in plans page and checkout page matches (trust).
2. Then test case to cover conversion for mobile users – heavy mobile traffic.
3. Pricing is shown same in all periods in both top and bottom parts – no confusion for user, periods can be chosen and changed (letting user freely decide and compare).
4. User can get information in his preferred and understandable language – to choose correct plan option.
5. Plans page should look professional in all different browsers.
6. Users, that are using only keyboard, should be able to navigate through page elements and choose plan – compliance and inclusion.

Information that would help to come up with better test cases:

- Requirements and designs for pricing page – like pricing rules, discounts, plans terms.
- Supported regions, languages, currencies.
- Supported devices and resolutions.
- Analytics of traffic – which devices/location to prioritize.
- Accessibility requirements (WCAG level).
